Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

In independent claims 1 and 4 directed towards a memory system, the following features taken in combination with the remaining limitations in the independent claims are not found in and/or are not obvious in view of the prior art of record, where the examiner interprets the language "memorizes" to mean "points to" or "refers directly to", as is well-known in the art for a pointer to functionally accomplish.

Claim 1, *"wherein a length of the signal transmission line of the at least one SIMM is longer than a length of the signal transmission line of the at least one DIMM, and wherein the longer length of the signal transmission line of the at least one SIMM increases the signal delay time of the at least one SIMM to further compensate for the signal delay time difference caused by the signal transmission line connected between the first and second sockets".*

Claim 4, *"wherein a length of the first signal transmission line of the first memory module is longer than a length of the second signal transmission line of the second memory module, and wherein the longer length of the first signal transmission line of the first memory module increases a signal delay time of the first memory module to compensate for the different loads of the first and second modules".*

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
